

Exhibit of
The Mint of the United States at Philadelphia,
~~Superintendent's Office,~~

Chicago Sept. 22, 1893.

Col. W. B. Bosbyshell

Sup't. U. S. Mint Philada.

Dear Sir.

Your kind letter of 20th inst
is at hand.

Our motor is now doing away
nicely and apparently is as good
as new.

Mr. Fooks the Superintendent of
the battery dept. of the Waddell - Cuty
Co. is expected to visit our exhibit
today and he will take a look at
the motor and try to solve the
problem of why she burned
out and also leave suggestions
to avoid mishaps in the future.

The Waddell-Euby Co is I suppose by this time repairing our old armature and when we have that returned to us we will be in good shape.

I ~~did~~ not mean to put a fly wheel on our shaft as the fair would be over before we could get one ready. but it was merely an idea of what might possibly be one cause of our trouble.

Medals are going off at the rate of 3000 per day. and it is impossible for us to get a stock ahead as it keeps the gold platers hustling to keep us going. and also the blanks are sometimes slow in reaching us. but so far we have been able to keep going and I think will

be much to the delight of friend
Ewing. "who is a daisy and no
mistake." we smoke his cigars. eat
dinner with him at the Victoria.
go with him to the Theatre &c &c.
Let the glorious work go on. October
30 is coming on apace.

We all do most heartily hope
that you can make the proprietors
of the Milwaukee Sentinel sweat for
what they published about you. and
that is why we were so exceedingly
glad when every thing was so
quickly cleared up.

To think of Henry Cochran in
Morgauencing.

Please hurry the new reverse
die. as the crack in the one now
in use is developing rapidly

Last night we had a glorious
pouring drenching rain. the first
since about the 15th of June and
it did a world of good. and gave
me three hours good solid work
this morning cleaning rust off the
press. and this morning is about
as nearly an ideal Fall day as
you could imagine

The "Worlds Fair Exiles" one
and all send you kindest regards

Very Respectfully
W. S. Beckley

September 22, 1893

Col. O.C. Bosbyshell
Supt. U.S. Mint Philada.

Dear Sir

Your kind letter of 20th inst. is at hand.

Our motor is now doing very nicely and apparently is as good as new.

Mr. Foots the superintendent of the battery dept. of the Waddell-Entz Co. is expected to visit our exhibit today and he will take a look at the motor and try to solve the problem of why she burned out and also leave suggestions to avoid mishap in the future.

The Waddell-Entz Co. is I suppose by this time repairing our old armature and when we have that returned to us we will be in good shape.

I did not mean to put a fly wheel on our shaft as the pair would be over before we could get one ready, but it was merely an idea of what might possibly be one cause of our trouble.

Medals are going off at the rate of 3000 per day, and it is impossible for us to get a stock ahead as it keeps the gold platers hustling to keep us going, and also the blanks are sometimes slow in reaching us, but so far we have been able to keep going and I think will be. Much to the delight of friend Ewing, "who is a daisy and no mistake" we smoke his cigars, eat dinner with him at the Victoria, go with him to the theatre &c &c. Let the glorious work go on October 30 is coming on apace.

We all do most heartily hope that you can make the proprietors of the Milwaukee Sentinel sweat for what they published about you and that is why we were so exceedingly glad when every thing was so quickly cleared up.

To think of Henry Cochran in Moyamensing.

Please hurry the new reverse die, as the crack in the one now in use is developing rapidly.

NARA RG104, Entry 1, Box 183

Last night we had a glorious pouring drenching rain. The first since about the 15th of June and it did a world of good, and gave me three hours good solid work this morning clearing rust off the press, and this morning is about as nearly an ideal Fall day as you could imagine.

The "Worlds Fair Exiles" on and all send you kindest regards.

Very Respectfully,
N.S. Beekley
